

Virtual Point of Sale (VPOS) Point-of-Sale Processing Made Easy

- Standard Feature
 - Value-Adding Product
 - Third-Party Solution
-
- Web Merchants
 - Retail Merchants
 - MOTO Merchants
 - Mobile Merchants

The Authorize.Net® Virtual Point of Sale™ (VPOS) turns any Internet-connected computer into a point-of-sale (POS) terminal with the simple addition of a USB HID MagTek® swipe card reader. VPOS is easy to implement, easy to use, secure, and best of all, inexpensive. Fully integrated with the Authorize.Net Payment Gateway, VPOS is an ideal solution if you accept credit card payments in person.

- + VPOS is enabled by simply plugging the USB card reader into your computer.
- + There are no additional fees—VPOS is included with all Card Present Authorize.Net accounts.
- + VPOS uses your existing Internet connection, eliminating the need for additional phone lines. Credit card transactions are authorized in as little as three seconds!
- + Sensitive data is transmitted securely using 128-bit Secure Sockets Layer (SSL) technology and stored in the Authorize.Net PCI-compliant data center.
- + Unlike other solutions, VPOS locks communication between the card reader and your browser, and alerts you in the event that other programs attempt to connect to the reader.
- + VPOS includes robust reporting. You can also import transactions into QuickBooks®.

System Requirements

- + Microsoft® Windows® 2000, XP, or Vista
- + MagTek® Mini USB HID Magstripe Swipe Card Reader (models 21040101, 21040102, 21040146, and 21040140) can be purchased from a variety of online retailers for approximately \$60.00 - \$80.00. Additional information can be found at MagTek's Web site at <http://www.magtek.com>.
- + Microsoft® Internet Explorer 6.0 or higher
- + Connectivity with a local or network printer as well as retail receipt printers Epson TM-T88III or Star TSP643U-24 (optional)

“ With VPOS, the advantage is that we didn't have to add a large amount of costly equipment. We could just use our existing computer, and I knew that would save us a bundle. ”

- Dan Phillips
Owner, Vinyl Renaissance

1. Your existing Internet-connected computer
2. Your existing printer
3. Authorize.Net Card Present Payment Gateway account
4. Magtek swipe card reader

About Authorize.Net®

Authorize.Net, a CyberSource solution (Nasdaq: CYBS), provides secure, reliable, payment gateway solutions that enable merchants to authorize, settle and manage electronic transactions anytime, anywhere, via Web sites, retail, mail order/telephone order (MOTO) call centers and on wireless devices. Authorize.Net is sold through an extensive network of reseller partners and financial institutions that offer its industry leading payment services to their merchant customers.
