

# TeleCheck<sup>®</sup> Check Cashing Service

Customers who cash their checks in your store are more likely to spend their funds there. When you quickly and securely cash personal, payroll, and government checks, you increase customer loyalty and may add a new source of revenue—check cashing fees.

## The Challenge

No merchant wants to turn away customers, but the hassles and risks of accepting these transactions have discouraged many retailers from offering check cashing services. In most instances, the approval process is cumbersome, which ultimately affects the customer's experience. Merchants need an efficient way to provide this service while minimizing risk and maximizing revenue.

## The Solution

With the TeleCheck<sup>®</sup> Check Cashing service, you provide a valued service that is as easy as validating checks for payment on day-to-day purchases. Ideal for grocery stores, hotels, gas stations and other retailers, the Check Cashing solution tells you in seconds the risk associated with the check. Our extensive and proprietary databases give you comprehensive check acceptance capabilities to provide this value-added service quickly and easily at each register. Merchants can opt for a basic verification tool or a warranted check cashing solution, and have the confidence that they are authorizing checks for the right customers.

## Here's How It Works

With the TeleCheck Check Cashing service, merchants can choose a verification or warranty service and process personal, government and payroll checks with confidence. Each check is analyzed using proprietary databases along with other risk scoring tools to determine the risk of accepting the check. If the check meets the basic requirements, the merchant can complete the transaction in the same way as a standard paper check.

# TeleCheck® Check Cashing Service
